Fractional Financial Controller — London Tech Company

Description

London (Hybrid) | Fractional, 2–3 days per week | Day rate negotiable

FD Capital is partnering with a fast-growing London-based technology company to appoint a hands-on Fractional Financial Controller. This is a 2–3 day per week role on a hybrid basis — a genuine portfolio opportunity for an experienced FC who wants to own the numbers for an ambitious, scaling business without a full-time commitment.

Our client has reached the stage where the finance function needs a safe pair of hands to take ownership of the day-to-day controllership — clean management accounts, tight controls and reliable reporting — while the leadership team focuses on growth. You'll be the person who makes sure the financial engine runs properly.

Responsibilities

The role

- Own the month-end close and produce accurate, timely management accounts
- Run cash flow forecasting, budgeting and management reporting for the board
- Embed and strengthen financial controls, processes and reconciliations
- Manage the day-to-day finance operations and any junior finance team / outsourced support
- Own the year-end audit and the relationship with external accountants
- Improve finance systems and automation — bringing order and scalability as the company grows
- Partner with the founders / leadership on the numbers behind commercial decisions

What our client is looking for

- A qualified accountant (ACA / ACCA / CIMA) with strong financial controller experience
- Hands-on controllership — comfortable owning the close, not just reviewing it
- Experience within a technology, SaaS or high-growth / startup environment
- Confident with modern finance systems (e.g. Xero, NetSuite, QuickBooks) and finance automation
- Comfortable working fractionally — self-directed, organised and able to add value in a focused 2–3 days
- A pragmatic, scale-up mindset: builds the controls a growing business needs without over-engineering

Qualifications

What's on offer

- Flexible, hybrid fractional role (2–3 days per week) with a high-growth London tech business
- Competitive day rate
