## Fractional / Interim CFO — Fundraising & Capital Structuring (Deep Tech IP)

### Description

**Location:** Harwell, Oxfordshire / flexible (remote-friendly)

**Engagement:** Fractional or Interim — day count negotiable

**Sector:** Deep technology / R&D

We are retained by an established, privately-owned deep-technology business seeking a finance leader to lead a near-term capital raise and put the funding structure in place to support an ambitious expansion plan.

Founded over seven years ago and fully self-funded to date, the company holds a strong portfolio of granted foundation patents and international IP, with a commercial model built on licensing and royalties. With a clear, well-defined growth roadmap ahead, the priority now is securing the right funding to unlock it — and this role sits at the heart of that.

### The Mandate

This is, first and foremost, a fundraising and capital-structuring engagement. Working directly with the founder, you will:

- Lead the company's near-term funding requirement from end to end — preparing the raise, building the investor/lender narrative, and driving it to completion
- Structure funding in a way that protects the founder's position and supports the expansion plan
- Build the financial models, forecasts and supporting materials (business plan, data room, projections) that underpin investor and lender engagement
- Identify and engage appropriate funding sources beyond mainstream high-street routes — specialist, alternative and asset/IP-backed lenders and investors
- Model and articulate the licensing and royalty revenue streams to support valuation and funding discussions

Alongside the raise, you will provide the financial leadership, controls and reporting expected of a CFO in a lean, founder-led business — but the funding outcome is the measure of success.

### Qualifications

- Qualified accountant (ACA / ACCA / CIMA) with a genuine, demonstrable fundraising track record — debt, equity, or both
- Hands-on experience preparing and leading raises: models, business plans, teasers, data rooms and investor/lender negotiation
- Strong network across specialist and alternative funding sources, not solely traditional bank finance
- Excellent financial modelling and commercial finance capability
- Comfortable in a fast-moving, confidential, IP-rich or R&D-led environment

### Hiring organization

FD Capital

### Employment Type

Part-time

### Beginning of employment

1st August 2026

### Duration of employment

Temporary

### Industry

Technology

### Job Location

Harwell, Oxfordshire, United Kingdom
